

Muhammad Hamdan Amir

Full-Stack and React Native Developer | MERN | Unity / C#

Lahore, Pakistan | +92 331 7047951 | hamdanamir2005@gmail.com

PROFILE

I build responsive web products and cross-platform mobile apps, from interface work through API and database integration. My recent work includes a Supabase-backed online store and a camera-first React Native specimen-scanning app.

TECHNICAL PROFILE

Web	React, JavaScript, Node.js, Express, REST APIs
Mobile	React Native, Expo, TypeScript
Data	MongoDB, Supabase, Firebase / Firestore
Tools	Render, Railway, Vercel, Git, GitHub, Unity, C#

SELECTED PROJECTS

Techora Pakistan - E-commerce Store

React / Supabase / Render / Vercel

- Built a responsive storefront with a Supabase-backed product catalog, category and price filters, and detailed product pages.
- Implemented sign-in, cart and wishlist flows, order placement, customer reviews, and admin product workflows.

Rock AI - Specimen Scanner

React Native / Expo / Firebase

- Built a camera-first field app with specimen capture, scan review, saved scan history, and animated scanning interactions.
- Added Firebase sign-in and scan sync, Reanimated UI feedback, and a backend API client for specimen analysis.

Ecourish - E-commerce Web Platform

React / Full Stack

- Built and deployed a responsive e-commerce site with product-focused browsing, authentication, and custom-domain deployment.

More selected projects

E-commerce, mobile, sports, and interactive game development

Juna - Jewellery Store and Bracelet Customizer

MERN

- Developed an e-commerce platform with cart and wishlist flows, custom orders, and an admin experience.
- Built an interactive bracelet customizer for configuring beads and charms.

BeSportsArena - Football Team Generator

React

- Created player ratings, captain selection, team balancing, and animated spin-wheel interactions.
- Designed and deployed a responsive sports interface.

Battle for the Court - Unity Game

Unity / C#

- Developed a street-style 1v1 basketball game with third-person movement, character animation, and gameplay logic.
- Implemented ball pickup and throwing mechanics with comic-style story panels.

EDUCATION AND CERTIFICATION

BS Computer Science | University of Management & Technology, Lahore | Expected 2027

Web Development Certification | Responsive frontend development, JavaScript, React, and modern web practices.
